Subject: - Press Release

Scrip Code: - 544189 – SATTRIX INFORMATION SECURITY LIMITED (“SATTRIX”)

Dear Sir/ Madam,

Pursuant to Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we are pleased to enclose a copy of the press release regarding launch of “NewEvol” developed by Satrix Software Solutions Pvt. Ltd., a wholly-owned subsidiary of the Company.

The above is for your information and records.

Kindly take this information on your records and acknowledge the receipt.

Thanking you,

Yours faithfully,

For, Satrix Information Security Limited

Ms. Rina Kumari
Company Secretary & Compliance Officer

Satrix Software Solutions Announces Launch of "NewEvol": A Next-Generation SIEM Built on Dynamic Threat Defense to Revolutionize SOC Operations

Ahmedabad, March 06, 2026: Satrix Information Security Limited (SATTRIX) BSE: 544189, ISIN: INEQUV01010, a global cybersecurity leader has announced product launch of NewEvol, its flagship Next-Generation SIEM platform developed and owned by Satrix Software Solutions Pvt. Ltd., a Wholly-owned subsidiary of the Company. The commercial availability of its next-generation SIEM and unified security operations platform across major global markets. Built on the Dynamic Threat Defense operating model, the platform delivers a purpose-built, unified foundation that consolidates detection, investigation, and response into an integrated operational system.

Dynamic Threat Defense is a continuous security operating model that integrates machine learning, behavioral analytics, threat intelligence, and automated response into a unified workflow. The platform continuously correlates telemetry, adapts as threats evolve, and executes defensive actions in real-time, enabling coordinated containment rather than sequential alert handling.

About NewEvol

NewEvol is a next-generation SIEM and unified security operations platform built on the Dynamic Threat Defense operating model. Developed by practitioners with more than a decade of real-world security operations experience, the platform consolidates detection, investigation, and response, shortening detection-to-containment time while reducing operational complexity and total cost of ownership.

NewEvol is developed by Satrix Software Solutions, an enterprise software engineering company specializing in advanced analytics and large-scale platforms, with offices in the USA, MEA, India, Malaysia, and Spain.

Key Innovations of NewEvol

- **Next-Gen SIEM & Log Management:** High-speed ingestion and analysis of massive data volumes.
- **Advanced SOAR Integration:** Automating complex incident response workflows to reduce "Mean Time to Respond" (MTTR).
- **Predictive AI:** Shifting from reactive monitoring to proactive threat hunting by identifying behavioral anomalies.

Security environments have become more distributed and unpredictable, while adversaries increasingly leverage automation and AI to accelerate attacks and evade static defenses. Alert-based, tool-dependent architectures struggle to keep pace. NewEvol replaces fragmented workflows with continuous telemetry correlation and orchestrated response within a unified system, enabling adaptive containment from initial signal through remediation.

“Security operations must evolve beyond fragmented, sequential models,” said Sachhin Gajjaer, Managing Director, Satrix Information Security Limited & Founder, NewEvol. “We built NewEvol to change the operating model. By combining a unified security operations platform with Dynamic Threat Defense, we replace static rules and manual coordination with a continuous, adaptive system that contains threats as they develop. That shift from reaction to coordinated defense is what ultimately reduces impact.”

Engineered from Frontline SOC Experience

NewEvol was developed by SOC analysts, security professionals, and engineers who bring more than a decade of experience operating in active production environments. Since 2018, the team has applied this frontline expertise to build and refine workflows, automation logic, and machine learning models that reflect real operational practices. This practitioner-driven foundation delivers consistent performance under real-world pressure.

Operational Simplicity and Lower Total Cost of Ownership

By consolidating multiple tools into a single integrated architecture, NewEvol reduces administrative overhead and eliminates complex integration maintenance. Streamlined onboarding and flexible deployment options accelerate time-to-value while supporting predictable cost models. The result is measurable operational efficiency without additional headcount or infrastructure sprawl.

Availability

NewEvol is now available to enterprise SOC teams and technology partners, including MSSPs, VARs, system integrators, and distributors across major global markets. Regional partner initiatives and localized market programs are planned throughout 2026.

The launch marks a significant milestone in Companies subsidiary’s product development roadmap and strengthens the consolidated portfolio of the Satrix Group in the global cybersecurity market.

About Satrix Information Security Limited:

Satrix Information Security Limited, founded in 2013, is a globally trusted cybersecurity solutions provider offering end-to-end, customer-centric services across India, the USA, the Middle East, and Malaysia. With over a decade of experience, Satrix delivers agile, cloud-based and on-premise solutions that help enterprises protect digital assets, ensure compliance, and maintain business continuity. Rooted in the mission “Removing the Risk from the Universe,” the name Satrix—derived from Sat (Universe), Ri (Risk), and X (Extenuation)—reflects our commitment to eliminating cybersecurity threats. Combining cutting-edge technology with deep expertise, we stand as a future-ready partner in today’s evolving digital landscape. For more information, please visit: <https://www.satrix.com/>.

About Satrix Software Solutions Private Limited:

Satrix Software Solutions Pvt Ltd, founded in 2018, is a premier technology innovation hub and a wholly-owned subsidiary of Satrix Information Security Limited (BSE: SATTRIX). Established to bridge the gap between complex business challenges and advanced digital solutions, the company serves as the specialized software development and R&D wing of the Satrix Group. With a core focus on Artificial Intelligence (AI), Machine Learning (ML), and Data Analytics, Satrix Software Solutions is the architect behind NewEvol, a globally recognized, proprietary Next-Generation Cybersecurity platform. For more information, please visit: <https://www.satrixsoftware.com/>.
